DAVI RIBEIRO

Software Engineer | Desenvolvedor Full Stack

São Paulo, Brazil | Gmail | LinkedIn | Git Hub | Portfolio

PROFESSIONAL EXPERIENCE

Software Developer **January 2023 - February 2024**

TRACTIAN | *Hybrid*

- Shipped features that received excellent user feedback within **+15 min** of launch.
- Contributed to features associated with an average session time of **+10 min**.
- Investigated production issues, identified root causes and delivered bug fixes and production hotfixes.
- Refactored and improved existing application code to support maintainability and reliable delivery.
- Integrated REST APIs and implemented filtering for large volumes of sensitive application data.
- Rebuilt the core Overview screen, contributing from application architecture through UI implementation.
- Participated in code reviews and testing within CI/CD workflows.
- Contributed actively to technical discussions and implementation decisions with backend, frontend, QA, UX/UI and hardware teams.
- Coordinated data flows and feature delivery across teams, including through cross-functional discussions and meetings.
- Applied a strong UI/UX focus, using Figma designs to guide interface implementation and collaborating with UX/UI partners to refine the experience.

Software Developer **February 2020 - Present (Part-time / On-call)**

BINDEMY | *Remote*

- Took an application from idea to complete release in **+1 month**.
- Leveraged AI-assisted development with Copilot/Claude to ship features **3x faster**, reducing delivery time from **1-2 weeks** to **2-3 days**.
- Developed and maintained educational applications used by **+2,000** registered students across **+7** institutions.
- Independently developed the mobile Q&A application, implementing WebSocket chat, message validation, media management and payment integration.
- Led development of a course platform with integrated payments and an accompanying application that reached **+1,000** downloads across platforms.
- Integrated AWS media storage and optimized storage for images, video and audio; implemented push and local notifications using Firebase Cloud Messaging and Flutter notification tools.

PROFESSIONAL SUMMARY

Software developer with four years of professional experience delivering and maintaining production applications, including a product serving **+50,000** monthly active users. Experienced in debugging, code review, testing, feature development, refactoring and application architecture. Primary professional background in Dart and Flutter, with additional knowledge of TypeScript, Java and Spring Boot. Rebuilt core application functionality and independently delivered products involving real-time communication, payment and API integrations. Interested in engineering work focused on code correctness, maintainability and solving technical problems. I use AI tools in a structured way to accelerate tasks and delivery, while keeping architecture decisions, quality, and strong engineering fundamentals at the core of the process

TECHNICAL SKILLS AND COMPETENCIES

Programming

Dart and Flutter; additional knowledge of Java, Spring Boot, Python, Node.js, TypeScript and JavaScript.

Software Design

Object-oriented programming, SOLID, design patterns, Clean Code and Clean Architecture.

AI & Data

Claude, GPT-4, AI agents, prompt engineering, Retrieval-Augmented Generation (RAG), LLM integration, semantic search, embeddings, vector databases and document chunking.

Languages

Portuguese: Native | English: Advanced | Spanish: Advanced | Russian: Intermediate

Code Quality

Debugging, unit testing, code review, troubleshooting, bug fixes and production hotfixes.

APIs and Data

REST API integration, GraphQL, WebSockets, SQL, relational data modeling and AWS media storage.

Delivery and Tools

Git, GitHub, GitLab CI/CD, GitHub Actions, Datadog, Firebase (Firestore, Notifications, Hosting, Authentication, Realtime Database), Figma (UI/UX Design) and Agile practices.
